

0. Chuẩn bị

Đối với linux, truy cập vào máy tính của khách hàng bằng xfreerdp3 . Trước đó tạo thư mục chia sẻ chung giữa hai máy để tiện sao chép dữ liệu sang,

```
sudo mkdir /mnt/share
```

```
cat /mnt/share/config  
Webhook
```

```
https://webhook.sysadminslls.com/webhook/misa
```

```
{ "job": "%%jobname%%", "status": "%%jobstatus%%", "machine":  
  "%%machinename%%", "backuptype": "%%backuptype%%", "error": "%%error%%" }
```

```
103.12.77.212_Lê Luyện
```

Ví dụ nội dung mà ta cần thao tác như trên để chia sẻ cho nhanh.

Kết nối đến máy chủ của khách hàng:

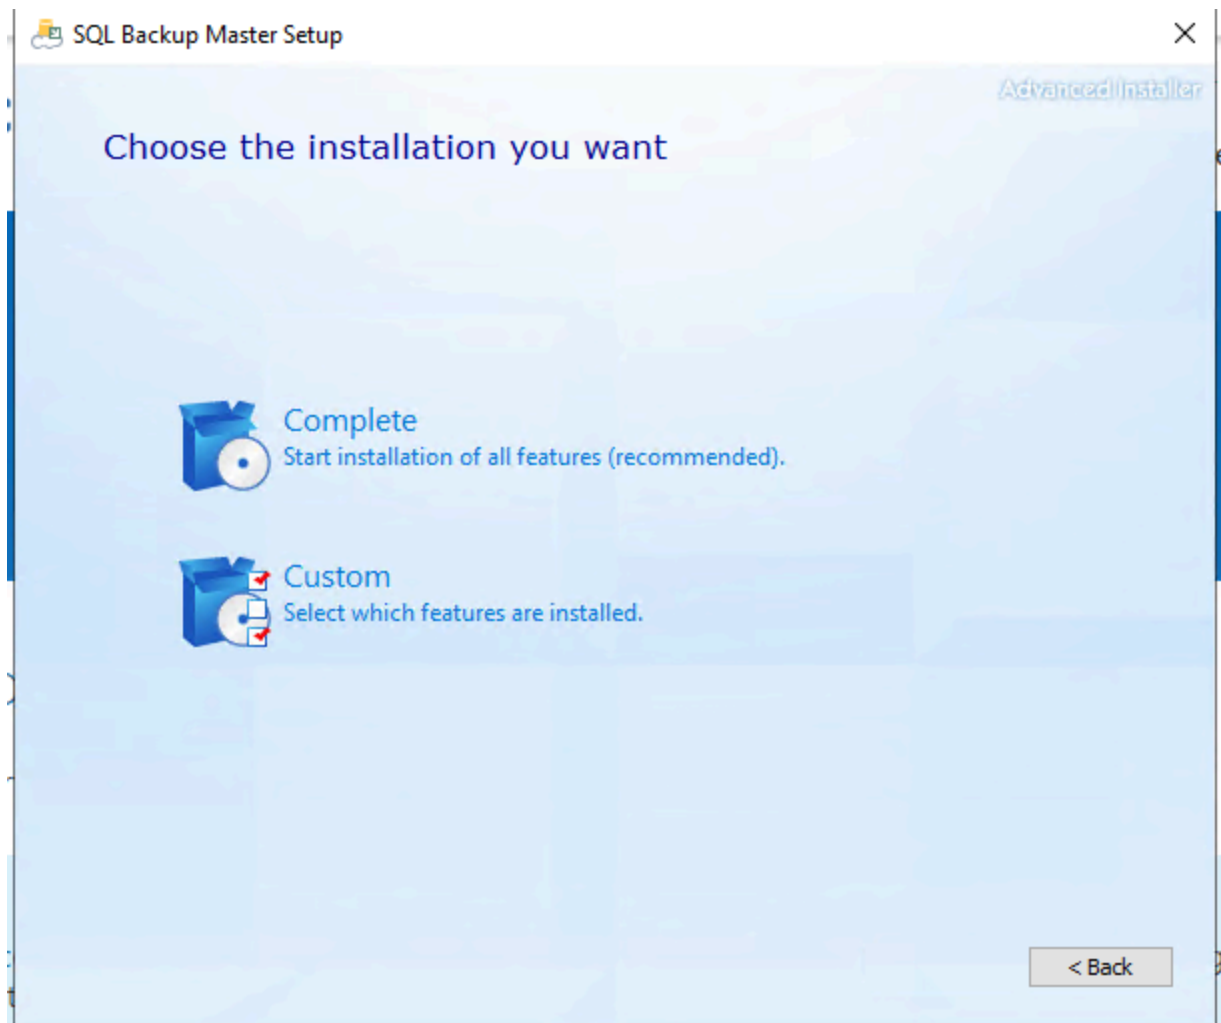

```
xfreerdp3 /v:<ip> /u:administrator /p:<password> /dynamic-resolution  
/drive:linux,/mnt/share
```

1. Cài lại MySQL backup Master

- Gỡ cài đặt bản cũ: Control Panel -> Uninstall Program -> Uninstall Mysql Backup Master

Tải file setup mới về và cài đặt

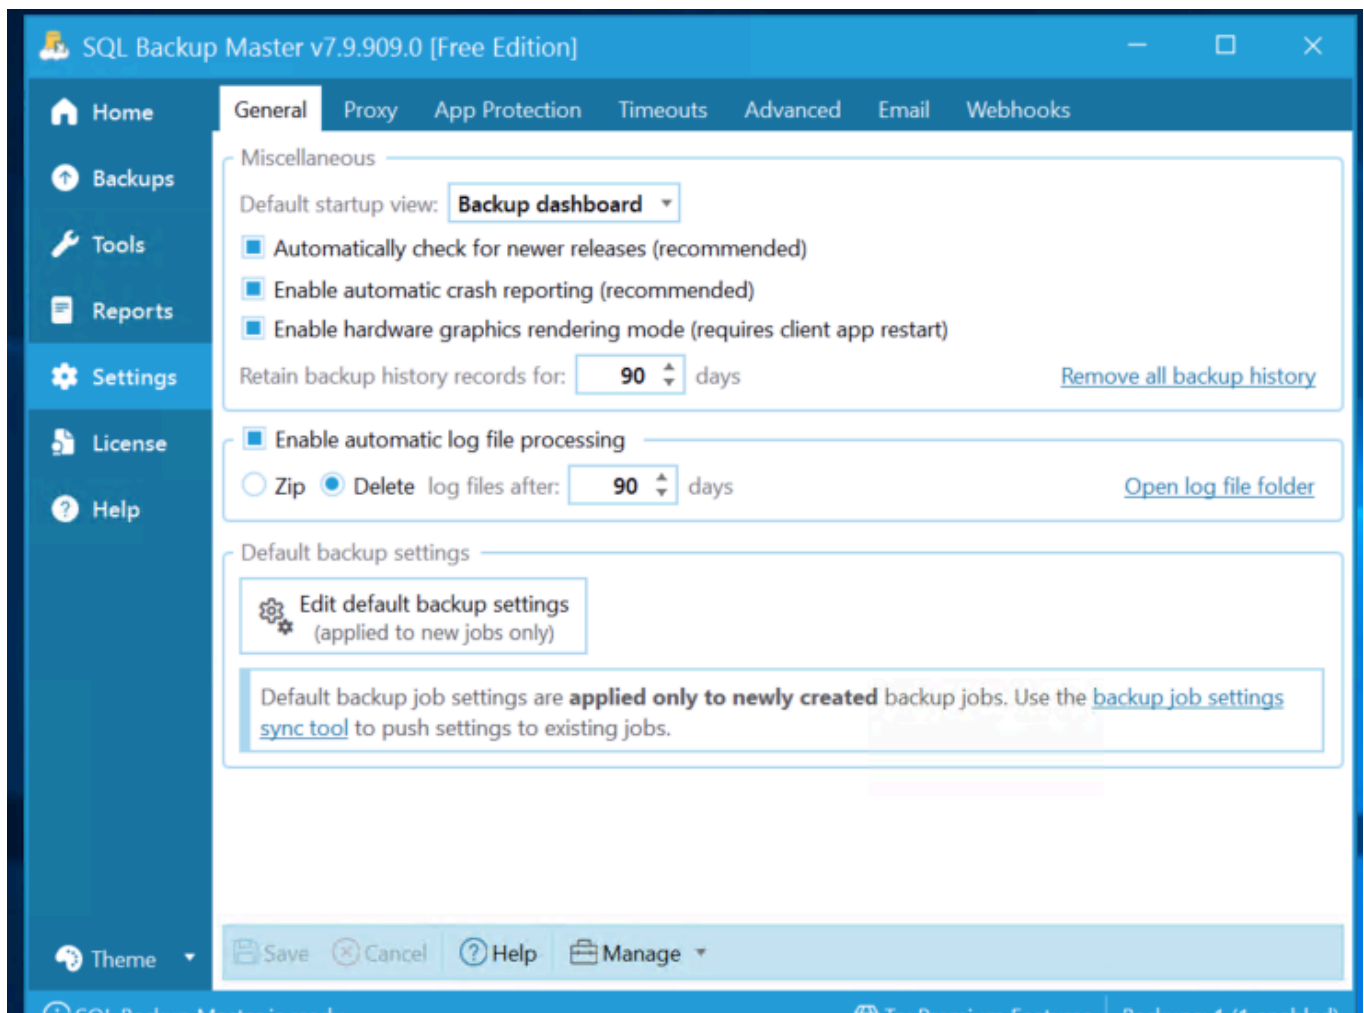

- Run SQL backup master.

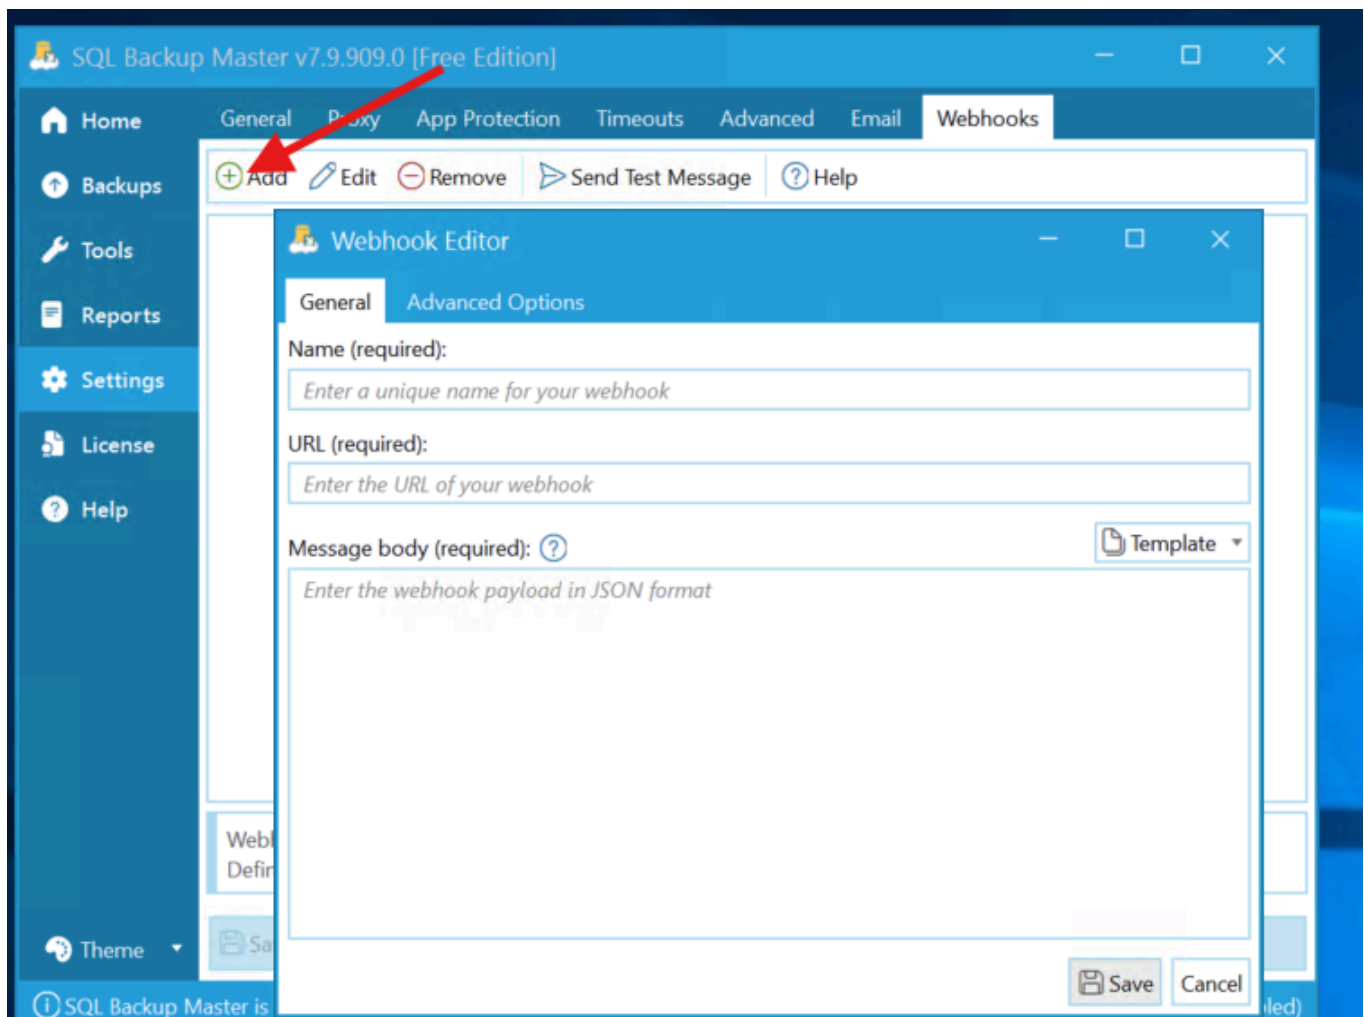

Ở bước này chọn complete

2. Cấu hình để gửi log đến Webhook

Vào setting, chọn Webhook

Chọn Add

Cấu hình như sau:

Name:

Webhook

URL:

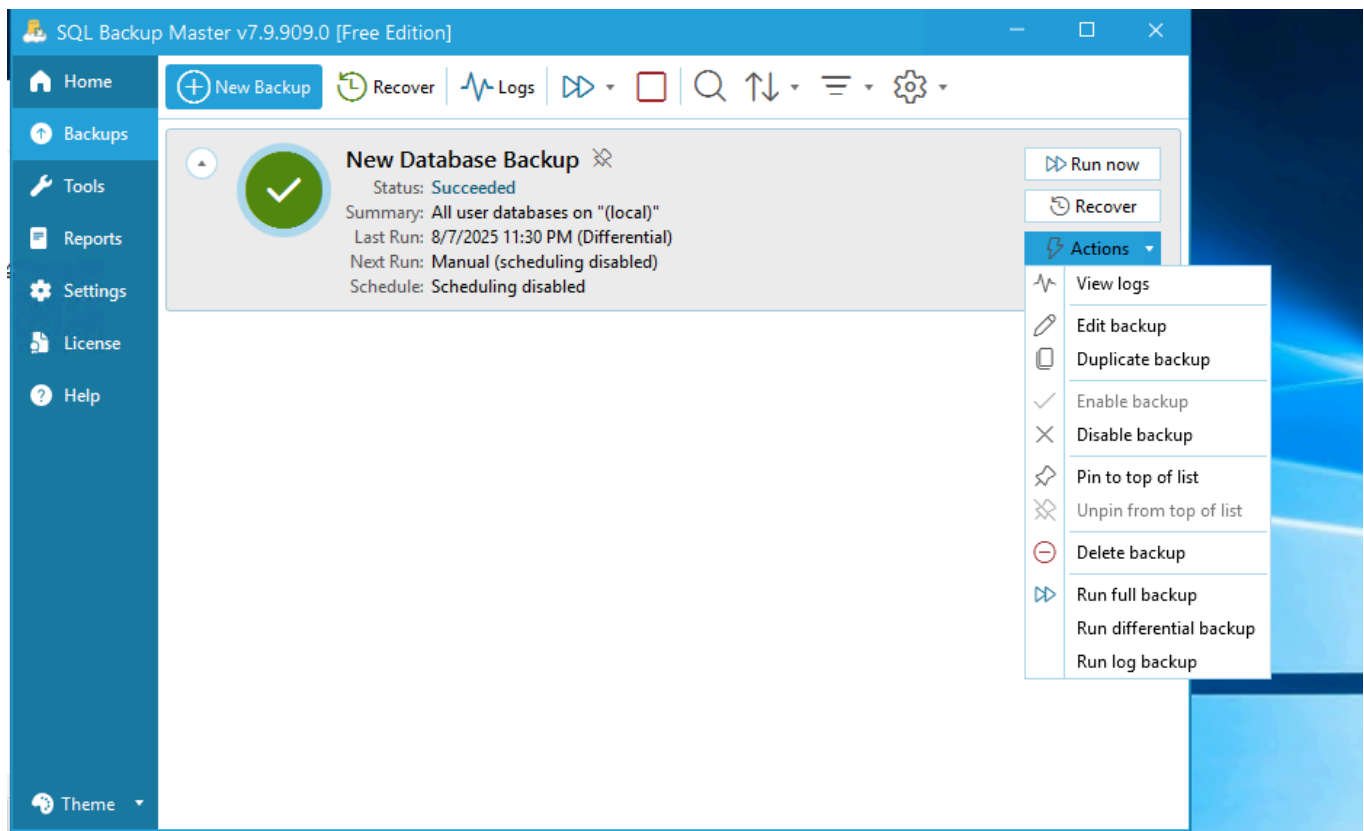

<https://webhook.sysadminskills.com/webhook/misa>

Message body

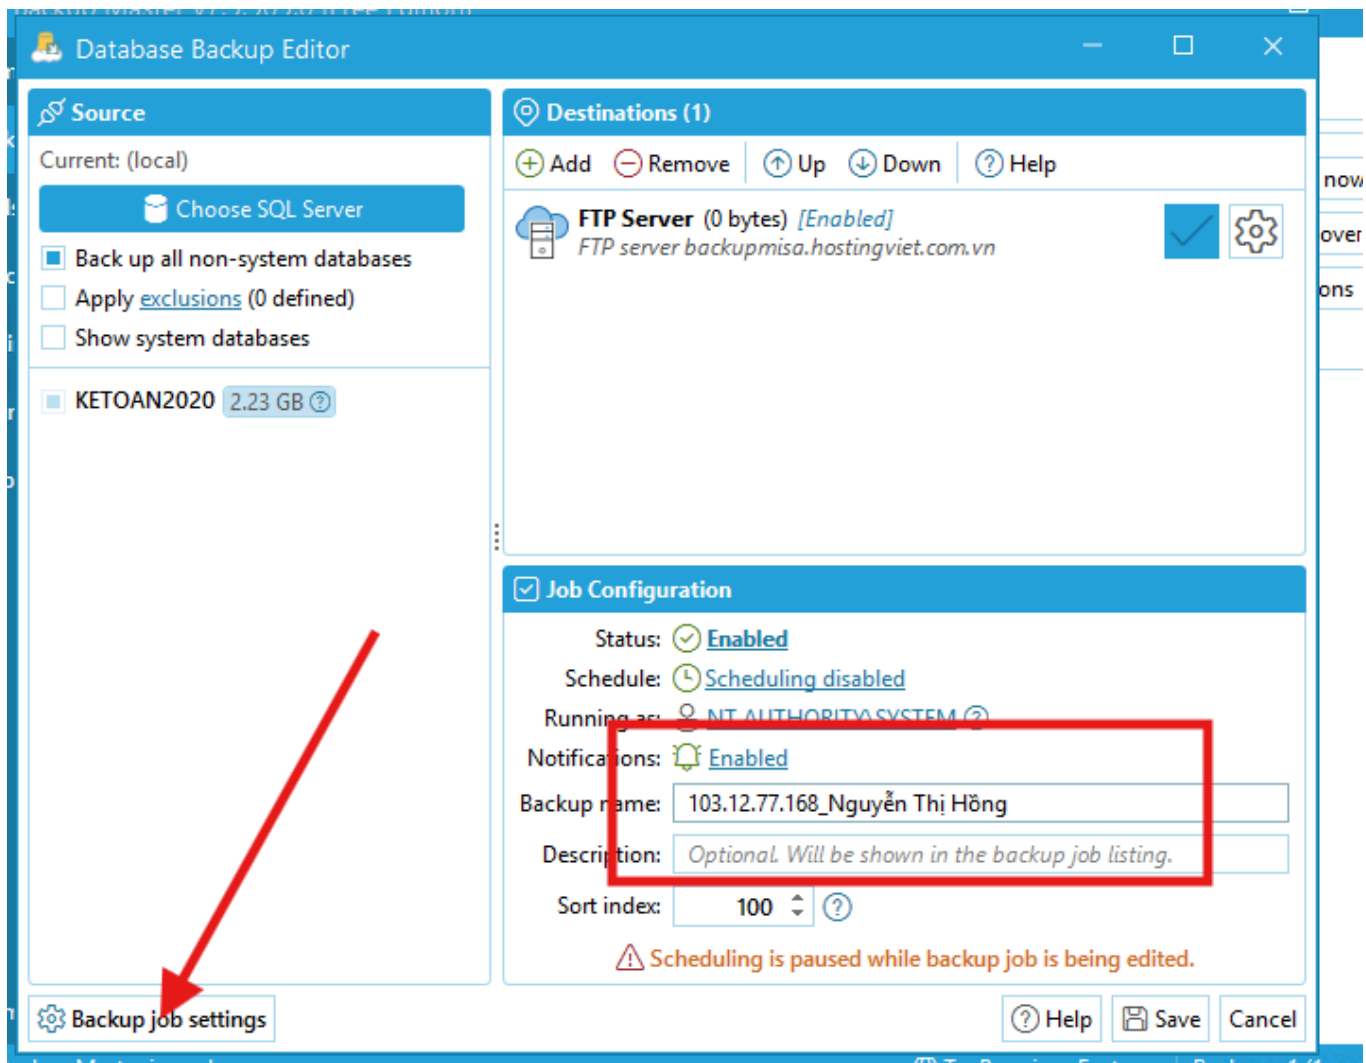

```
{ "job": "%jobname%", "status": "%jobstatus%", "machine":  
"%machinename%", "backuptype": "%backuptype%", "error": "%error%" }
```

Chú ý save lại.

Tiếp sang mục backup -> Action -> Edit backup

Nhập backup name như hình

Chọn backup Job settings -> Notifications -> Setting như hình

Backup Job Settings

Send (or show) notifications on

Full backups: ☒ Success ☒ Failure (or finished with errors)

Differential backups: ☒ Success ☒ Failure (or finished with errors)

Transaction log backups: ☒ Success ☒ Failure (or finished with errors)

☒ Show desktop notifications

This feature requires installation of the SQL Backup Master tray notification component.

☐ Send email notifications

Subject: [Edit](#)

Recipient(s):

☐ Send failure notifications separately to:

☐ Do not include log details in notification email message bodies (status summary only)

Send webhook notifications

☒ Webhook (<https://webhook.sysadminsskills.com/webhook/misa>)

Manage

☐ Save these settings as default

Help Save Cancel

Chọn lại task schedule cho đủ 12 hours

Backup Job Schedule

Schedule **Retry on Failure**

☒ Full backup every **12 hrs** starting on **12/11/2024 6:00 AM**

☒ Diff backup every **0 hrs** **30 mins** (after the full backup)

☐ Log backup every **1 hrs** **0 mins** (after the full backup)

Advanced Options

End date/time: (optional)

Days of week: ☒ Sun ☒ Mon ☒ Tues ☒ Wed ☒ Thu ☒ Fri ☒ Sat

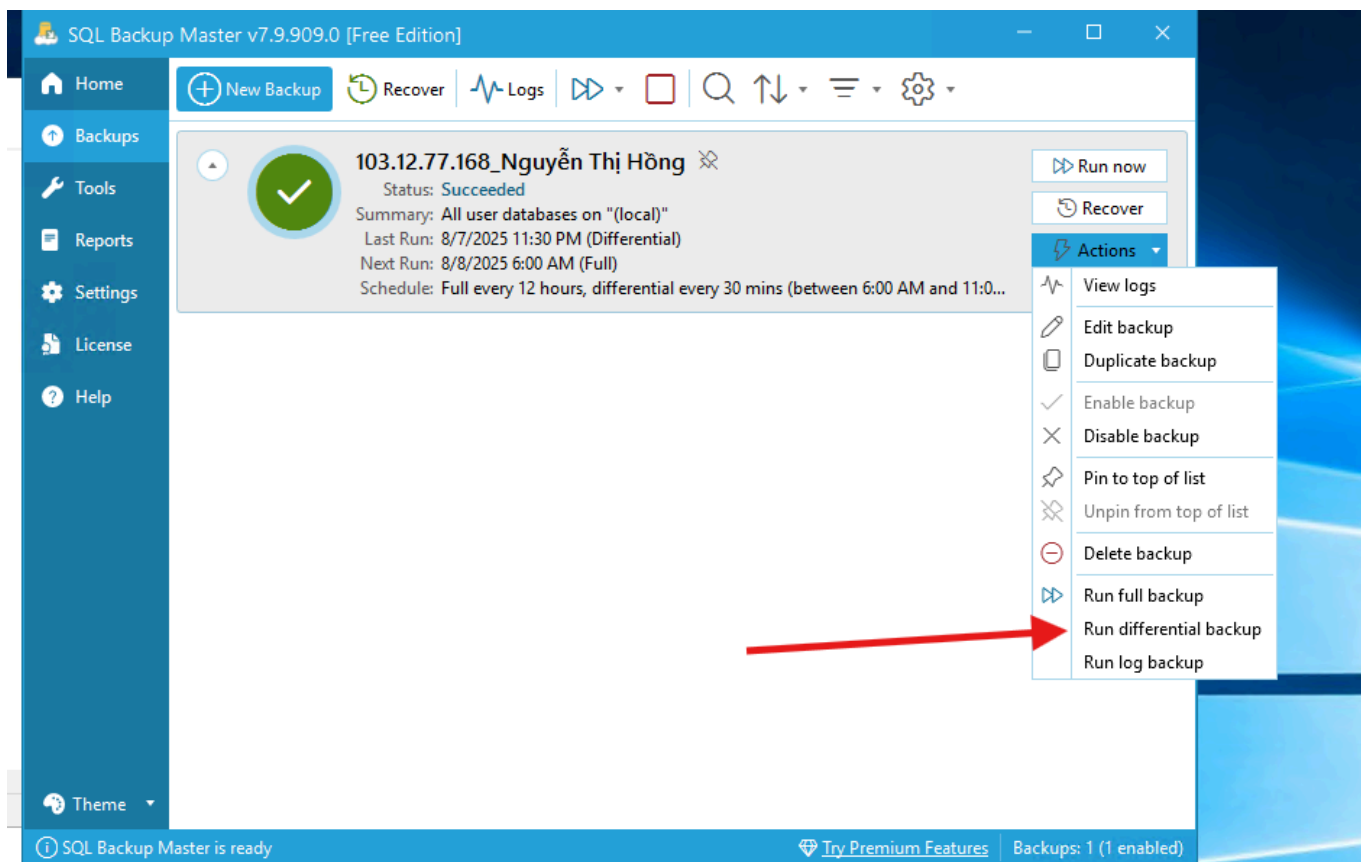

Days of month:

☒ Run between: **6:00 AM** and **11:00 PM**

Estimated Execution Plan

Friday, August 8, 2025 6:00 AM	Full
Friday, August 8, 2025 6:30 AM	Differential
Friday, August 8, 2025 7:00 AM	Differential
Friday, August 8, 2025 7:30 AM	Differential
Friday, August 8, 2025 8:00 AM	Differential
Friday, August 8, 2025 8:30 AM	Differential
Friday, August 8, 2025 9:00 AM	Differential

Lưu lại, chọn action -> Run Differential back up

Tiếp theo truy cập vào: <https://webhook.sysadminsskills.com/>

Kiểm tra log xem thành công hay lỗi.
